DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 21 March 2006 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 10, 11, 13-17, and 28 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Independent Claim 10 establishes the limitation "a processor generating a test signal represented by a temporal maximum length sequence (MLS) and at least one other test signal represented by a different temporal maximum length sequence, and the processor supplying the test signals as electric input signals to the electroacoustic converter. The

Office notes that page 10, lines 15-16, of the specification establish that a signal generated by MLS generator 21 is supplied to the power amplifier 14 to drive the loudspeakers 15, ..., 19. The office has reviewed the specification and has not found support for "...at least one other test signal represented by a different temporal maximum length sequence, and the processor supplying the test signals as electric input signals to the electroacoustic converter".

Allowable Subject Matter

4. Claims 1-7, 9, 19-26, and 27 allowed.
